These bundles provide unlimited use of the optional features selected by the Customer to include in the bundle.

Service Description

Customers subscribing to the Business Local Service bundle may subscribe to any or all of the following features where available.

Call Waiting - allows a customer to control the treatment applied to incoming calls while the customer is off-hook on an existing call. While on an existing call, Call Waiting Deluxe notifies the customer of an incoming call with the call waiting tone.

Calling Name and Number - provides for the delivery of the listed name and telephone number associated with the calling party telephone number on incoming calls. This information is provided to the subscriber to Calling Name and Number service so that the information may be displayed on a customer-provided display device attached to the subscriber's line or telephone set.

Voice Mail Support Package - provides the combination of the Call Forwarding Busy, Call Forwarding Don't Answer, and Message Waiting Indicator services.

Hunting - is the process by which two or more exchange service lines, served from the same central office and furnished to the same customer, are grouped so that incoming calls overflow to the first non-busy line if the called line is busy. A busy signal is not given unless all the grouped lines are busy.

6. PRI SERVICE (Voice T1 Monthly Fee)

Service Description

Primary Rate Interface (PRI) Service is an ISDN local exchange service that provides a Customer with the ability to transmit and receive multiple voice and data circuit switched calls simultaneously over a single Primary Rate Facility. PRI Service is available from suitably equipped central offices and where suitable loop facilities exist.

PRI Service consists of a Primary Rate Facility and B-Channel Bearer Trunks and D-Channel Bearer Services. The Primary Rate Facility and the ISDN Bearer Trunks are not offered separately. Up to twenty-three B-Channels Bearer Trunks and one D-Channel Bearer Service may be provisioned on each access line. In addition, optional features may be purchased as specified below. Only flat rate trunk channels are available.

Optional Features

The following features are available to PRI Service customers at additional cost.

Call-By-Call Service Selection - This feature provides the option for B-Channels to be assigned into a flexible trunk group which can support different call types based on real-time traffic needs. Call-By-Call service selection also allows primary as well as secondary long-distance carriers to be established for the entire trunk group (e.g., Alternate Routing Arrangement).

Individual Calling Line Identification (ICLID) - This feature provides customer access to the calling party's number. Feature operation is dependent on customer premise equipment and technology in use at the calling party's serving office.

Direct Inward Dialing (DID) - This feature provides Direct Inward Dialing to a station. DID Termination rates will apply per B-Channel configured with this option. ISDN Primary Rate Interface Service DID Number Blocks are ordered with DID Terminations on the B-Channels.

Back-up D-Channel - This feature provides a minimum of three or more Primary Rate Interface Service facilities terminating at the same customer premises to share one primary and one secondary (or Back-up) D-Channel. The number of Primary Rate Interface Service facilities that can be shared by this feature will be based upon the availability of central office and other network facilities, and will be subject to change on a central office by central office basis.

Channel Transfer Service - This feature allows the customer to transfer an incoming call to another line and then hang up leaving the other two parties on a two-way call and freeing up the customer's line for another call. The customer will be responsible for toll charges associated with the transferred call.
