The point of demarcation and/or interconnection between Company communications facilities and terminal equipment, protective apparatus or wiring at a customer's premises. Company-installed facilities at or constituting the demarcation point will consist of wire or a jack conforming to Subpart F of Part 68 of the FCC's rules. "Premises" as used in this section generally means a dwelling unit, other building or a legal unit of real property such as a lot on which a dwelling unit is located, as determined by the Company's reasonable and nondiscriminatory standard operating practices. The "minimum point of entry" as used in this section will be either (1) the closest practicable point to where the wiring crosses a property line or (2) the closest practicable point to where the wiring enters a multiunit building or buildings.

The Company's reasonable and nondiscriminatory standard operating practices will determine which of (1) or (2) will apply. LOCAL SERVICES TARIFF

SECTION 2 - REGULATIONS, (CONT'D.)

2.2 OBLIGATION AND LIABILITY OF COMPANY

2.2.1 Liability Limitations

Approval of language contained in this tariff by the PSCSC does not constitute a determination by the Commission that the limitation of liability imposed by the Company should be upheld in a court of law. Approval by the Commission merely recognizes that since it is a court's responsibility to adjudicate negligence and consequent damage claims, it is also the court's responsibility to determine the validity of any exculpatory clauses.

2.2.2 Availability of Facilities

The Company's obligation to furnish service or to continue to furnish service is dependent on its ability to obtain, retain, and maintain without unreasonable expense suitable rights and facilities, and to provide for the installation of those facilities required incident to the furnishing and maintenance of that service.

LOCAL SERVICES TARIFF

SECTION 2 - REGULATIONS, (CONT'D.)**2.2 OBLIGATION AND LIABILITY OF COMPANY, (CONT'D.)****2.2.3 Service Irregularities and Interruptions**

In the event of an interruption to service which is not due to the negligence or willful act of the customer, there will be allowed a prorata adjustment of the monthly charges involved, for the service and facilities rendered useless and inoperative by reason of the interruption, during the time said interruption continues in excess of twenty-four hours from the time it is reported to the Telephone Company or detected by the Company. For the purpose of administering this regulation, every month is considered to have thirty days.

For the purpose of applying this provision, the word "interruption" shall mean the inability to complete calls; incoming, outgoing, or both. "Interruption" does not include and no credit allowance shall be given for service difficulties such as slow dial tone, busy circuits, or other network and/or switching capacity shortages. Nor shall the credit allowance apply where service is interrupted by the negligence or willful act of the customer or the failure of facilities provided by the customer, or unlawful or improper use of the facilities or service.

No credit allowance will be made for interruptions due to electric power failure, where by the provisions of this tariff, the customer is responsible for providing electric power.

The liability of the Company for damages arising out of mistakes, omissions, interruptions, delays or errors, or defects in transmission occurring in the course of furnishing service or facilities, and not caused by the negligence of the customer, or of the Company in failing to maintain proper standards of maintenance and operation and to exercise reasonable supervision, will in no event exceed an amount equivalent to the proportionate charge to the customer for the period of service during which the mistake, omission, interruption, delay or error, or defect in transmission occurs.

LOCAL SERVICES TARIFF

SECTION 2 - REGULATIONS, (CONT'D.)**2.2 OBLIGATION AND LIABILITY OF COMPANY, (CONT'D.)****2.2.3 Service Irregularities and Interruptions, (Cont'd.)**

The customer indemnifies and saves the Company harmless against claims for libel, slander, or infringement of copyright arising from the material transmitted over its facilities; against claims for infringement of patents arising from combining with, or using in connection with, facilities of the Company, apparatus and systems of the customer; and against all other claims arising out of any act or omission of the customer in connection with the facilities provided by the Company; and against any and all losses from damage to the customer's facilities or equipment attached or connected to facilities furnished by the Company.

2.2.4 Transmitting Messages

The Company does not undertake to transmit messages but offers the use of its facilities for communications between its customers.

2.2.5 Use of Connecting Company Lines

When the lines of other companies are used in establishing connections to points not reached by the Company's lines, the Company is not liable for any act or omission of the other company or companies.

2.2.6 Defacement of Premises

The Company is not liable for any defacement or damage to the customer's premises resulting from the existence of the Company's equipment and associated wiring on such premises, or from the installation or removal thereof, when such defacement or damage is not the result of the Company's negligence.

When the customer is a tenant and requests an installation that could, in the opinion of the Company, result in damage to the property of the owner, the customer must obtain, prior to installation, a written release from the owner or his authorized agent absolving the Company of liability.

LOCAL SERVICES TARIFF

SECTION 2 - REGULATIONS, (CONT'D.)

2.3 USE OF SERVICE AND FACILITIES

2.3.1 Ownership and Use of Service and Equipment

Equipment and lines furnished by the Company on the premises of a customer are the property of the Company, whose agents and employees have the right to enter the premises at any reasonable hour for the purpose of installing, inspecting, maintaining, or repairing the equipment and lines, or upon termination of the service, for the purpose of removing the equipment or lines.

Equipment furnished by the Company must, upon termination of service for any cause whatsoever, be returned to it in good condition, except for reasonable wear and tear.

Customer-provided equipment or protective circuitry may be connected to the telecommunications network in accordance with provisions of the Federal Communications Commission's registration program, as are now in effect or may become effective.

Customer-provided terminal equipment and communications systems may be connected at the customer's premises to telecommunications services furnished by the Company, where the connections are made in accordance with the provisions of Part 68 of the Federal Communications Commission's (FCC's) Rules and Regulations, and any Company tariffs.

2. Responsibility of the Customer

The customer is responsible for the installation, operation and maintenance of any customer-provided terminal equipment or communications system. No customer-provided terminal equipment or communications systems or combinations thereof may require change in or alteration of the equipment or services of the Company, cause electrical hazards to Company personnel, damage to Company equipment, malfunction of Company billing equipment, or degradation of service to persons other than the user of the subject terminal equipment or communications system, the calling or called party. Upon notice from the Company that customer-provided terminal equipment or communications system is causing such a hazard, damage, malfunction or degradation of service, the customer must make whatever changes are necessary to remove or prevent the hazard, damage, malfunction or degradation of service.

The customer is responsible for the payment of a Maintenance of Service Charge as provided in Section 2, of this tariff for visits by a Company employee to the customer's premises when a service difficulty or trouble report results from the use of customer-provided terminal equipment or communications system.

(Cont'd.)****A. General Provisions, (Cont'd.)****3. Responsibility of The Company**

Telecommunications services are not represented as adapted to the use of customer-provided terminal equipment or communications systems. Where customer-provided terminal equipment or communications systems are used with telecommunications services, the responsibility of the Company is limited to furnishing service components suitable for telecommunications services and to the maintenance and operation of service components in a proper manner for those services. Subject to this responsibility, the Company is not responsible for (1) the through-transmission of signals generated by the customer-provided terminal equipment or communications systems, or for the quality of, or defects in this transmission; or (2) the reception of signals by customer-provided terminal equipment or communications systems; or (3) address signaling, where this signaling is performed by customer-provided signaling equipment.

At the customer's request, the Company will provide the interface parameters needed to permit customer-provided terminal equipment to operate properly with the Company's telecommunications services.

The Company may make changes in its telecommunications services, equipment, operations or procedures, where these changes are consistent with Part 68 of the FCC's Rules and Regulations. If changes made by the Company can be reasonably expected to render any customer's communications system or terminal equipment incompatible with telecommunications services, or require modification or alteration of the customer-provided communications systems or terminal equipment, or otherwise materially affect its use or performance, the customer will be given adequate notice of the changes in writing, to allow the customer an opportunity to maintain uninterrupted service.

4. Recording of Two-Way Telephone Conversations

The recording of two-way telephone conversations is governed by state and federal laws and regulations.

The customer must discontinue use of the terminal equipment or communications system or correct the violation and must confirm in writing to the Company within 10 days, following the receipt of written notice from the Company, that such use has ceased or that the violation has been corrected. Failure of the customer to discontinue such use or to correct the violation and to give the required written confirmation to the Company within the time stated above will result in suspension of the customer's service until the customer complies with the provisions of this tariff.

C. Premises Wiring Associated With Registered Communications Systems

Premises wiring is wiring which connects separately-housed equipment entities or system components to one another, or wiring which connects an equipment entity or system component with the telephone network interface or demarcation point not within an equipment housing. All premises wiring, whether fully protected or unprotected, must be installed in compliance with FCC Part 68.

SECTION 2 - REGULATIONS, (CONT'D.)**2.4 ESTABLISHMENT AND FURNISHING OF SERVICE****2.4.1 Application for Service**

The Company may refuse an application for service if objection is made by or on behalf of any governmental authority to furnishing the service.

An application for service becomes a contract upon the establishment of service. Neither the contract nor any rights acquired under it may be assigned or transferred in any manner except as specifically provided for in this tariff. Requests for additional service, when established, become a part of the original contract, except that each item of additional service is furnished subject to payment of applicable charges.

If an applicant has an outstanding account with the Company, the Company reserves the right to reject application for service until the amount due for local services included in this tariff has been paid in full.

A contract for service may be transferred to another individual, partnership, association, or corporation. No billing adjustment for local exchange service previously furnished will be made and the new customer must assume all outstanding indebtedness of the original customer. For an existing customer, a maximum deposit may be required up to an amount equal to the total actual bills of the highest two consecutive months within the preceding six months. Such deposit will be refunded or credited to the customer upon termination or after one year of prompt payment for service.

2.4.3 Telephone Numbers

The customer has no property right in the telephone number which is assigned by the Company, or any right to continuance of service through any particular central office, and the Company reserves the right to change the telephone number or the central office designation, or both, of a customer whenever it deems it necessary to do so in the conduct of its business.

SECTION 2 - REGULATIONS, (CONT'D.)**2.6 VARIABLE TERM PAYMENT PLAN****2.6.1 General**

- A. The Variable Term Payment Plan (VTPP) is a payment plan which allows customers to pay a fixed rate for services over one of any currently available payment periods. A different monthly rate applies for the duration of each period. The monthly rate varies inversely with the length of the payment period, e.g., the monthly rate for a short period is greater than that for a long period.
- B. The minimum period is 12 months, unless otherwise specified in product tariffs.
- C. During the effective term of a customer's initial payment period, the monthly rate is not subject to Company-initiated changes.
- D. Unless specifically exempted, services furnished under the Variable Term Payment Plan are subject to all general regulations applicable to the provision of service by the Company as stated elsewhere in this and other tariffs.

2.6.2 Regulations

- A. Application of Rates and Charges (unless stated otherwise in the product tariffs)
 - 1. The monthly rate applicable at the time a customer subscribes to a product or service under the Variable Term Payment Plan is not subject to Company-initiated change during the initial payment period, providing there are no customer-initiated delays in the establishment of the subscribed-for product or service.
 - 2. After the expiration of either the initial payment period or the subsequent 12-month payment periods the monthly rate will continue to be the same rate that the customer paid under their initial term agreement. The rate will be subject to Company-initiated changes with a 60-day written notice to the customer during which time the customer shall have the right to terminate the agreement, without incurring termination charges. The rate adjustment would not exceed the tariffed rate.
 - 3. Nonrecurring charges are to be paid in full at the time of installation.
 - 4. In the event that all or any part of the service is disconnected at customer request before expiration of any selected payment period of greater than one month's duration, the customer will be required to pay termination charges as stated in this tariff.
 - 5. Rates and charges apply according to the appropriate schedules for products and services offered under the Variable Term Payment Plan.

The customer has the following renewal options:

The rates will be those currently in effect for new customers at the time of renewal. The new payment period starts the day following completion of the prior payment period.
2. If upon completion of the current payment period the customer has not chosen a new payment period and has not requested discontinuance of service, the customer's agreement will automatically renew for a 12-month period at the rate the customer is paying under their current agreement unless either party notifies the other in writing or verbally of its intention not to renew, at least 30 days before the end of the then-current term.

SECTION 2 - REGULATIONS, (CONT'D.)**2.6 VARIABLE TERM PAYMENT PLAN, (CONT'D.)****2.6.2 Regulations, (Cont'd.)****C. Early Contract Termination**

Unless otherwise noted in individual product tariffs, if the customer terminates their service prior to the expiration date of the term agreement, the customer will be required to pay early termination charges that equate to the monthly charges for the remainder of either the initial payment period or the subsequent 12-month payment periods. If nonrecurring charges associated with the installation of the business services were waived, the customer will become liable for payment of the waived charges.

Inclusion of early termination liability by the company in its tariff or a contract does not constitute a determination by the Commission that the termination liability imposed by the company is approved or sanctioned by the Commission. Customers shall be free to pursue whatever legal remedies they may have should a dispute arise.

D. Additions

If the customer wishes to make additions, the customer may also select, from those currently available in the tariff, a different payment period of equal or shorter length than the time remaining in the period selected for the existing service at the current filed rates for the selected period. The additions may then have a different expiration date than the existing service.

SECTION 2 - REGULATIONS, (CONT'D.)**2.6 VARIABLE TERM PAYMENT PLAN, (CONT'D.)****2.6.2 Regulations, (Cont'd.)****E. Upgrades**

1. Allowable upgrades to products offered by the Company are specified in the individual tariffs currently in effect for offerings under the Variable Term Payment Plan.
2. A customer who elects to upgrade an installed product may choose one of two options, unless otherwise specified in the product tariffs:
 - A. The existing payment period may be extended by a period of time specified in the product tariff, and the new and the previously installed service will expire on the same date. The rate level applicable for the new service is the one currently in effect for the payment period which the customer had selected prior to the upgrade, while the rates for services previously installed and continuing in service are unaffected. (If the payment period selected by the customer prior to the upgrade has been discontinued in the tariff, the new service will be billed at rates applicable for the next shorter payment period in the current tariff.)
 - B. The new service may be billed over a currently available payment period of equal or shorter length than the time remaining in the existing payment period. Current rates apply for the selected payment period for the new service. Rates for service previously installed and continuing in service are unaffected. The expiration date of the new service is then either the same as or earlier than that of the previously installed system.

When the expiration date of the new service is earlier, the customer must select another payment period for the service according to the terms and conditions stated in the preceding paragraph at the time of expiration.

SECTION 2 - REGULATIONS, (CONT'D.)**2.6 VARIABLE TERM PAYMENT PLAN, (CONT'D.)****2.6.2 Regulations, (Cont'd.)****F. Downgrades**

1. Allowable downgrades for installed services are specified in product tariffs.
2. A customer has the option to place any new service on a coterminous payment unless otherwise specified in the product tariff. Rates for the new service are those currently in effect for the original payment period (or, if the period is no longer available, for the next shorter one). The rates for services remaining after the downgrade will not be affected.
3. When a coterminous payment period is not chosen for new service, the customer must select a payment period of equal or shorter length than the time remaining in the current payment period. Current rates apply for the equal or shorter payment period. Service remaining on the customer's premises will continue to be billed at the rates in effect before the downgrade. The new service may then have a different expiration date from the service which remained after downgrading.
4. When the expiration dates differ, the customer must select a new payment period for the service (at the time of expiration) added at the time the service was downgraded, according to the terms and conditions in this section.

SECTION 3 - DIRECTORY LISTINGS**3.1 TERMS AND CONDITIONS**

Listings are regularly provided in connection with local exchange service. At the request of the customer, the listing may be omitted from the directory and directory assistance records (Non-Published Service).

The rates and regulations specified in this section apply only to the alphabetical directory. The alphabetical directory is a list of telephone numbers of customers and others arranged alphabetically by surname, business, association, institution, or other nonresidence name.

The alphabetical directory is designed for the purpose of informing calling parties of the telephone number of customers and others listed in it. Accordingly, listings are intended solely for purposes of identification and are limited to information which is essential to such identification.

The Company does not publish a directory of subscriber listings. The Company, however, does arrange for the Subscriber's main billing number to be placed in the directory of the dominant local exchange carrier.

All Directory Listings, regardless of type, must conform to the specifications for the directories. The Company reserves the right to modify the listings to accommodate the space limitations in the directory. Not all listing types are available in all directories.

The Company may refuse a listing which does not constitute a legally authorized or adopted name, or any listing which in its opinion is likely to mislead or to deceive calling parties as to the identity of the listed party, or is intended for advertising purposes or is more elaborate than is reasonably necessary to identify the listed party. The listing of a service, commodity or trade name is not permitted except when such service, commodity or trade name is a part of the name under which the listed party conducts his or her business. The Company may, upon notifying the Customer, discontinue any listing found to be in violation of the foregoing regulations.

A descriptive term characterizing the listed party's business or purpose in a general way may be furnished (in abbreviated form) as a part of the listing, when desired and available. When the character of the listed party's business or purpose is apparent from the name under which it is conducted, a further designation is unnecessary and is not furnished.

SECTION 3 - DIRECTORY LISTINGS, (CONT'D.)**3.1 TERMS AND CONDITIONS, (CONT'D.)**

Abbreviations may be used to limit the length of any listing when in the opinion of the Company, the clearness of the listing and the identification of the listed party is not impaired by use of abbreviations.

Special arrangement of names is not permitted.

Non-Published Service customers forfeit non-address, non-list, or non-published service privacy when calling the Universal Emergency Number Service (911). The telephone number and address of the station from which the emergency call originates are passed to the Public Safety Answering Point along with the call in order for emergency units to respond to the call.

Incoming calls to Non-Published Service customers will be completed by the Company only when the calling party places the call by number. The Company will adhere to this practice regardless of any claim of emergency the calling party may present.

The acceptance by the Company of the customer's request for Non-Published Service does not create any relationship or obligation, direct or indirect, to any person other than the Customer.

The Company makes every effort to safeguard the address and numbers of Non-Published Service customers. However, in the absence of gross negligence or willful misconduct, no liability will attach to the Company for damages arising from inadvertently publishing the address or telephone number of a Non-Published Service customer in the directory; or disclosing the number or address to any person. The customer indemnifies and saves the Company harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the publication of the number of a Non-Published Service customer in the directory or otherwise disclosed, the Company's liability is limited to and satisfied by a refund of any monthly charges made by the Company.

Providing the name, address and/or telephone number of a Non-Published Service customer to the customer's primary interexchange carrier for billing purposes only, does not constitute publication or disclosure of the customer's name, number and/or address under this tariff.

SECTION 7 – PRI SERVICE**7.1 TERMS AND CONDITIONS****7.1.1 Service Description**

PRI Service is an ISDN local exchange service that provides a Customer with the ability to transmit and receive multiple voice and data circuit switched calls simultaneously over a single Primary Rate Facility. PRI Service is available from suitably equipped central offices and where suitable loop facilities exist.

PRI Service consists of a Primary Rate Facility and B-Channel Bearer Trunks and D-Channel Bearer Services. The Primary Rate Facility and the ISDN Bearer Trunks are not offered separately. Up to twenty-three B-Channels Bearer Trunks and one D-Channel Bearer Service may be provisioned on each access line. In addition, optional features may be purchased as specified in B.5 of this section.

PRI Service will provide transport of customer information over the 23 available B channels in the form of circuit-switched voice or data at speeds up to 64 Kbps. The basic service will include the 1.544 Mbps switched facility and the D-Channel Bearer Service. B-Channels will be ordered in addition to the Primary Rate Facility.

Dedicated B-Channel configuration: Dedicated trunk groups are the standard feature for PRI Service. Dedicated trunk groups must be assigned to handle one specific call type (examples: DID, DOD).

Three types of B-Channel Bearer Trunk Channels are available as follows.

- A. Standard channels provide the same features as analog trunk lines found in the Local Exchange Services section of this Nonresidence Service Agreement.
- B. DID channels provide direct inward dialing service.
- C. Two Way DID channels provide capability for two way standard service and direct inward dialing service.

D-Channel configuration: Each Basic PRI service will include a dedicated D-Channel for signaling.

All Bearer Trunk Channels use MF or DTMF signaling.

Only flat rate trunk channels are available.

SECTION 7 – PRI SERVICE, (CONT'D.)**7.1 TERMS AND CONDITIONS, (CONT'D.)****7.1.2 Definitions****A. Primary Rate Facility**

A Primary Rate Facility is a digital pipe from the Customer's location to the Company central office which transports one or more ISDN Bearer Trunks (b. and c. following). A Primary Rate Facility can carry up to twenty-three 64 Kbps B-Channel Bearer Trunks and one 64 Kbps D-Channel Bearer Service. All selected Bearer Trunks and Services can operate on the Primary Rate Facility simultaneously.

B. B-Channel Bearer Trunks

B-Channel Bearer Trunks define the types of traffic that the Primary Rate Facility will carry. A B-Channel Bearer Trunk is a 64 Kbps information channel used in conjunction with circuit-switched service. These trunks can be configured as 1-Way In, 1-Way Out, or 2-Way.

C. D-Channel Bearer Services

The D-Channel Bearer Service is a 64 Kbps signaling channel used to control associated B Channels. One D-Channel is required for each Primary Rate Facility, and is included in the Primary Rate Facility's monthly rate.

SECTION 7 – PRI SERVICE, (CONT'D.)**7.2 REGULATIONS**

PRI Service is furnished subject to the availability of suitable facilities and is only served from specially-equipped digital central offices.

Service from some central offices may not provide all of the features and functionality described in this section.

PRI Service is offered under the Variable Term Payment Plan as outlined in this tariff Agreement.

Early contract termination charges as outlined in the Variable Term Payment Plan section of this tariff apply to this service.

The minimum service period for PRI Service is twelve months.

The Customer must provide customer premises equipment that meets the technical requirements of the serving central office.

The Customer is responsible for providing power to all customer premises equipment (CPE) attached to the Primary Rate Facility.

The Customer must notify the Company when call type maximums and minimums are to be changed for the call-by-call feature. This is in order to maintain the proper provision of directory numbers and call control on the line.

Customers wishing to upgrade existing analog trunk service to PRI Service will be charged the listed initial charges for the appropriate number of Primary Rate Facilities and will have to convert to the PRI Service DID rate structure. Initial charges on B-Channel Bearer Trunk Channels are waived for the existing analog trunks that are moved to PRI Service. Any new channels added at the time of conversion to PRI Service will incur initial charges.

When a customer transfers a call, the customer is responsible for any toll charges associated with the customer originated leg(s) of the call.

One 911 charge is applied to each outgoing and 2-way B-Channel Bearer Trunk (per channel).

SECTION 7 – PRI SERVICE, (CONT'D.)**7.3 PRI SERVICE OPTIONAL FEATURES**

The following features are available to PRI Service customers at additional cost.

A. Call-By-Call Service Selection

This feature provides the option for B-Channels to be assigned into a flexible trunk group which can support different call types based on real-time traffic needs. Call-By-Call service selection also allows primary as well as secondary long-distance carriers to be established for the entire trunk group (e.g., Alternate Routing Arrangement).

B. Individual Calling Line Identification (ICLID)

This feature provides customer access to the calling party's number. Feature operation is dependent on customer premise equipment and technology in use at the calling party's serving office. (Similar to the Caller ID feature available on access lines.)

C. Direct Inward Dialing (DID)

This feature provides Direct Inward Dialing to a station. DID Termination rates will apply per B-Channel configured with this option. ISDN Primary Rate Interface Service DID Number Blocks are ordered with DID Terminations on the B-Channels

D. Back-up D-Channel

This feature provides a minimum of three or more Primary Rate Interface Service facilities terminating at the same customer premises to share one primary and one secondary (or Back-up) D-Channel. The number of Primary Rate Interface Service facilities that can be shared by this feature will be based upon the availability of central office and other network facilities, and will be subject to change on a central office by central office basis.

E. Channel Transfer Service

This feature allows the customer to transfer an incoming call to another line and then hang up leaving the other two parties on a two-way call and freeing up the customer's line for another call. The customer will be responsible for toll charges associated with the transferred call. This feature is for digital channels only and is not intended for Integrated Prime Advantage channels used to transport analog, local exchange service.
