POWER USER — 1000 Mbps

- Bandwidth for now and the future
- 100X faster than the average broadband connections*, and 20X faster than Spectrum's fastest internet speeds
- Do what you want, right now! No waiting. No buffering

*The availability of Fioptics Internet service speeds is dependent on actual service address. Download and upload speeds may vary based on service address. Actual speed may vary based on limitations of the customer's computer network, inside wiring, devices, use of TV video on demand, network congestion, and location compared to Cincinnati Bell network facilities. Fastest Internet in town based on comparison to Charter/Spectrum highest advertised speeds as of 6/3/19.
